TASK 1

BUILD A PERSONAL PORTFOLIO WEBSITE

- **Objective:** Create a personal portfolio website that highlights your skills, previous work (if applicable), and contact information.
- **Skills Involved:** HTML, CSS, basic JavaScript, and optionally some light web design principles.
- **Description:** The intern will design and develop a simple, responsive portfolio website. They will learn how to structure content, style the page, and use basic JavaScript to add interactive elements like a contact form or a lightbox for images. This task encourages understanding of website structure and design.

TASK 2

DESIGN A SIMPLE LANDING PAGE

- **Objective:** Design a single-page "landing page" for a fictional product or service.
- **Skills Involved:** HTML and CSS.
- **Description:** The intern will design a one-page layout with sections such as a hero section (with a title, image, and call-to-action button), a features section, and a footer. This helps practice working with different HTML elements and organizing content on a page, as well as basic styling using CSS (e.g., colors, fonts, and

TASK 3

B U I L D A S I M P L E C O N T A C T F O R M

- **Objective:** Create a form with fields for a user to enter their name, email, and a message.
- **Description:** The intern will create an HTML form that includes input fields for the user's name, email address, and a text area for the message. They will then style the form with CSS. Optionally, the form could include basic validation to ensure the fields are filled out properly

After completing all the task please upload it on the github by creating a new repository.

After uploading we will provide you a google form where you have to submit the link of all the three task.

THANK YOU
